ABSTRACT

Detachable multi-interface CD/DVD/Computer network unit; which includes a touch screen panel control system with manual activation for multiple connections for other electrical devises.

ABSTRACT OF THE DISCLOSURE

With the detachable multi-interface CD/DVD/Computer network unit you're able to control all electronic devises that are connected inside the network system; including a touch screen control panel with manual activation for DVD, CD, Radio, Palm Pilot, MP3, GPS, Cell Phone, and CD Changer. The purpose of this invention is to allow a user to download, view, or interact with a cell phone, palm pilot, or MP3 but with the larger touch screen panel instead or their current smaller display screen; instead of touching their small buttons they can use a large touch screen control panel.
